EXAMINER

GRANT II, JEROME

ART UNIT

PAPER NUMBER

2625

NOTIFICATION DATE

DELIVERY MODE

05/15/2008

ELECTRONIC

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

mailroom@bskb.com

<b>Office Action Summary</b>	<b>Application No.</b> 10/659,679	<b>Applicant(s)</b> HORIE ET AL.	
	<b>Examiner</b> Jerome Grant II	<b>Art Unit</b> 2625	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-35 is/are pending in the application.  
     4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-24, 31, 32 and 35 is/are allowed.
- 6) ☒ Claim(s) 25-30, 33 and 34 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
     Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
     Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
     a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Detailed Action

**1. In claim 35, first line, delete “claim” first occurrence.**

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25-30, 33 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Campana.

With respect to claim 25, Campana teaches a fax signal transmitting device (620) for transmitting fax signals from a fax terminal 618 or 204 (fo fig. 21) the transmitting device comprising:

A frame assembling part (digital signal processor or U3) for generating a frame data (shown by fig. 2) by combining a fax signal output (data unit frame group) from the fax terminal and a redundancy fax signal output (crc/bch error code, according to figures 22) from the fax terminal before the fax signal (first and second data unit of the next

frame group) and for outputting the frame data onto a transmission line(wireless channel 616, see col. 21, lines 30-35.)

With respect to claim 26, Campana teaches signal storage part 730,734, 752 and 754, for storing the fax signal from a fax terminal (see figure 21 which is the typical transceiver device for fax device 620).

With respect to claim 27, Campana teaches generating frame data by combining the fax signal output (1st and second data unit of the next frame group) from said fax terminal and a plurality of previous fax signals (first thru tenth data unit of current frame group) output from the fax terminal.

With respect to claim 28, Campana teaches wherein the frame assembling part generates the frame data by combining an nth fax signal ( 2<sup>nd</sup> data of the next frame group) an (n-1) th fax signal ( 1<sup>st</sup> data unit of the next frame the group) and an n-2 fax signal ( 10<sup>th</sup> data unit of current frame group) .

With respect to claim 29, Campana it is inherent when the number of errors exceed a predetermined threshold in the CRC, the data will be retransmitted and the process repeated until the number or detected transmission errors is within a predetermined threshold.

With respect to claim 30, Campana teaches a frame packet wherein each packet contains 3 1/2 pages. See col. 4, lines 42-50. Moreover, while Campana uses a synchronous transmission scheme, The transmission is not time clocked until the paging events can be determined. At col. 8, lines 31-36, it states the paging events are random, hence the transfer of the page data must in certain respects be translated asynchronously.

With respect to claim 33. Campana teaches a method of transmitting fax signals (see figures 22) output from a fax terminal 618 or 704 ( see figure 21) comprising the steps of:

Generating frame data via PSO (u3) by combining a fax signal output from the fax terminal and a redundancy fax signal (crc/bch error code, see figures 22) output from the fax terminal before the fax signal (1st and 2<sup>nd</sup> data unit of the next frame group); and transmitting the frame data onto a transmission line (wireless channel 616).

With respect to claim 34, Campana teaches wherein the redundancy fax signal crc/bch is previous to the fax signal output by the terminal. Note that the is crc signal appears before the first and second data unit of the next frame group. See figures 21 and 22.

3.

### Claims Allowed

Claims 31, 32 and 35 are allowed for the reason the prior art does not teach the selector as claimed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerome Grant II whose telephone number is 571-272-7463. The examiner can normally be reached on Mon.-Fri. from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Coles, can be reached on 571-272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

/Jerome Grant II/

Primary Examiner, Art Unit 2625
